Radius restrictions: Minimum internal radius 30mm, Minimum external radius 30mm.

Worktop Configuration

It is important that you let us know how your custom-made surfaces will be positioned within the room design by sending us a sketch.

Our advice is that most surfaces are supplied over size so that you avoid the need for expensive templating.

Additional guidance is available on request.

Configuration Example:

A - Open End Worktop

Worktop A is open at one end so it should not be necessary to supply this over size.

B - Restricted Worktop

Worktop B is fixed in size between 2 walls.
We will supply this over size for you to scribble accurately on site.

C - Island Worktop

Worktop C is an island and can be supplied to the exact size required with finished edges
