## Lucente...

Our Lucente door is made from 22mm MDF, vacuum sealed on exposed edges, primed and then finished with 2 coats of polyurethane paint. We've even got a colour co-ordinated reverse, but while kitchen doors might look the same, the reality is quite different.

### COMMON PROBLEMS WITH TYPICAL J PULL DOORS:

*Peace of mind  
with Jigsaw*

## Vivo...

Vivo is manufactured from 18mm MDF and finished in the same process as Lucente. Ensure you know exactly what you're buying and how long you want it to last for.

### COMMON PROBLEMS WITH TYPICAL SLAB DOORS:

#### PEELING VINYL

Vinyl doors are glued and have the propensity to peel when exposed to the regular steam of a kettle or heat of an oven.

#### CHIPBOARD

Chipboard can be used as a door substrate but can blow and raise when exposed to water. Not a good combination for a kitchen.

#### BUBBLED VINYL

Vinyl doors start to bubble before peeling creating an unsightly look that can't be repaired.

#### PEELING EDGES

Look out for peeling edges that can flap and irritate you. It's common in kitchens and home and office furniture.
