

# FRANKE VENICIAN TAP

Installation instructions

*Make  
it  
Wonderful*

**FRANKE**

## Technical Data

Minimum water pressure: 7.25PSI (0.5 bar)  
Maximum water pressure: 75PSI (5 bar)  
Maximum hot-water temperature: 70°C  
Recommended hot water temperature: 65°C

**Note:** Exceeding these temperatures or water pressures can result in damage to the tap.

**A pressure reducing valve may be required to be fitted in high water pressure situations.**

## Attention

Before installing the new mixer it is essential that you thoroughly flush through the supply pipes in order to remove any remaining swarf, solder or other impurities.

Failure to carry out this simple procedure could cause problems or damage to the workings of the mixer.

Having first checked all new connections, turn on the mains stopcock, close all taps except the new mixer and as the system starts to refill check for leaks.

Once you have satisfied yourself that there are no leaks, switch on the water heating.

## Preparation

First shut off your water heating system then, with your mains stopcock closed, open the lowest hot and cold taps in the house and allow to run until the cold storage tank and pipes are empty (the hot water storage cylinder always remains full).

## Installation

First screw the threaded stud into the mixer body. Screw the tails into the mixer body and fully hand tighten.

After making any necessary alterations to existing pipework, pass the plinth over the tails and fit in position.

The shaped upstand on the plinth will locate in the tap body and the 'O'ring should be placed in the recess to make a seal with the sink.

When the tap is in position (with the cold side on the right when viewed from the front) slide the nylon bracing plate up to the underside of the sink together with the retaining plate, and secure by screwing the fixing nut finger tight.

Check that the mixer body and plinth are correctly positioned and fully tighten fixing nut.

It is recommended that 15mm x 15mm compression fittings be used to connect mixer to supply pipes. Cold is connected to the right and hot on the left when viewed from the front.

## Warning

These hints have been prepared for your guidance, you must exercise due care at all times. We do not accept responsibility for any problems that may occur through incorrect installation.

**NB.** If for any reason the spout is removed from the tap, care must be taken when reinserting the spout into the body to ensure that the Grub Screw is located in the split of the white PTFE ring.

## How to care for your tap

To maintain the appearance of this tap, ensure it is cleaned only using a clean, soft damp cloth. A solution of warm water and mild liquid detergent may be used where necessary, and then the fitting rinsed thoroughly. Abrasive cleaners or acidic cleaners **MUST NOT BE USED** under any circumstances. Avoid contact with all solvents.

### Available finish

115.0184.669	Chrome
115.0184.670	SilkSteel

### Parts list as follows

FUN number	Part name	Part code
133.0261.022	Spout Chrome	SP3791 CH
133.0261.023	Spout SilkSteel	SP3791 SS
133.0261.024	‘O’ ring kit	SP3790
133.0194.117	Antisplash Chrome	SP3633 CH
133.0194.118	Antisplash SilkSteel	SP3633 SS
133.0194.075	Handle hot Chrome	SP3632-H CH
133.0194.076	Handle cold Chrome	SP3632-C CH
133.0194.078	Handle hot SilkSteel	SP3632-H SS
133.0194.079	Handle cold SilkSteel	SP3632-C SS
133.0259.530	Hot indices Chrome	SP3765-H CH
133.0259.753	Cold indices Chrome	SP3765-C CH
133.0259.755	Hot indices SilkSteel	SP3765-H SS
133.0259.756	Cold indices SilkSteel	SP3765-C SS
133.0194.119	Valve cover Chrome	SP3635 CH

133.0194.120	Valve cover SilkSteel	SP3635 SS
133.0194.131	Base plinth Chrome	SP3636 CH
133.0194.132	Base plinth SilkSteel	SP3636 SS
133.0358.191	Hot valve	SP3984-H
133.0358.192	Cold valve	SP3984-C
133.0150.092	Fixing kit	SP1430
133.0437.496	Flexi-tails	SP2596

## Guarantee

Your Franke mixer has been manufactured to the high standard you would expect of any Franke product but in the unlikely event that you should experience any defect in the materials or workmanship within one year of purchase, we will replace the faulty part free of charge. This is provided the mixer has only been used for normal domestic purposes in the UK and that the care, installation and maintenance instructions have been observed.

You should also retain your dated invoice as proof of purchase to validate any claims under our guarantee.

This one year guarantee is extended to five years in the case of the valve mechanism.

Normal wear and tear is excluded from the guarantee.

Decorative surface finishes are guaranteed for one year from the date of purchase provided our advice concerning care has been observed and no scouring agents have been used.

Scuffs and scratches caused by improper installation or accidental damage are not covered by this guarantee. Neither are slight shade variations or any damage or defect caused by incorrect installation or abuse of the fitting.

## Optional tap brace

A large or heavy tap fitted to a stainless steel inset sink may occasionally flex the sink. To counteract this, Franke has developed an innovative tap brace that can be purchased separately. The tap brace connects the tap to the worktop and not just to the sink, offering additional support to the tap and much more stability when fitted. The tap brace has a variable collar to ensure it will fit most models of tap and can be used on any inset stainless steel sink.

The Franke tap brace is available on request from most kitchen retailers.
